

The FreeStyle Libre portfolio of products is covered by the Department of Veterans Affairs for those who qualify^{1,2}

PRESCRIPTION CRITERIA^{1,2}

The Veteran has Type 1, Type 2, or other unspecified diabetes and requires an intensive insulin regimen (e.g. ≥ 3 injections/day, or insulin pump) to achieve desired glycemic control (target range) based upon shared decision-making, as recommended by VA/DoD Clinical Practice Guidelines Management of Diabetes Mellitus in Primary Care (2017).

The Veteran has the knowledge and skill set necessary to successfully utilize CGMS, including an understanding of the need to do SMBG for calibration as recommended by the manufacturer, and to evaluate “high” or “low” blood glucose results or trends based upon readings and/or alarms as recommended by the FDA and the treating healthcare team.

The Veteran has followed provider recommendations for SBGM and therapy changes. This will assist providers with determining potential adherence with CGMS, which is essential in achieving improved outcomes.

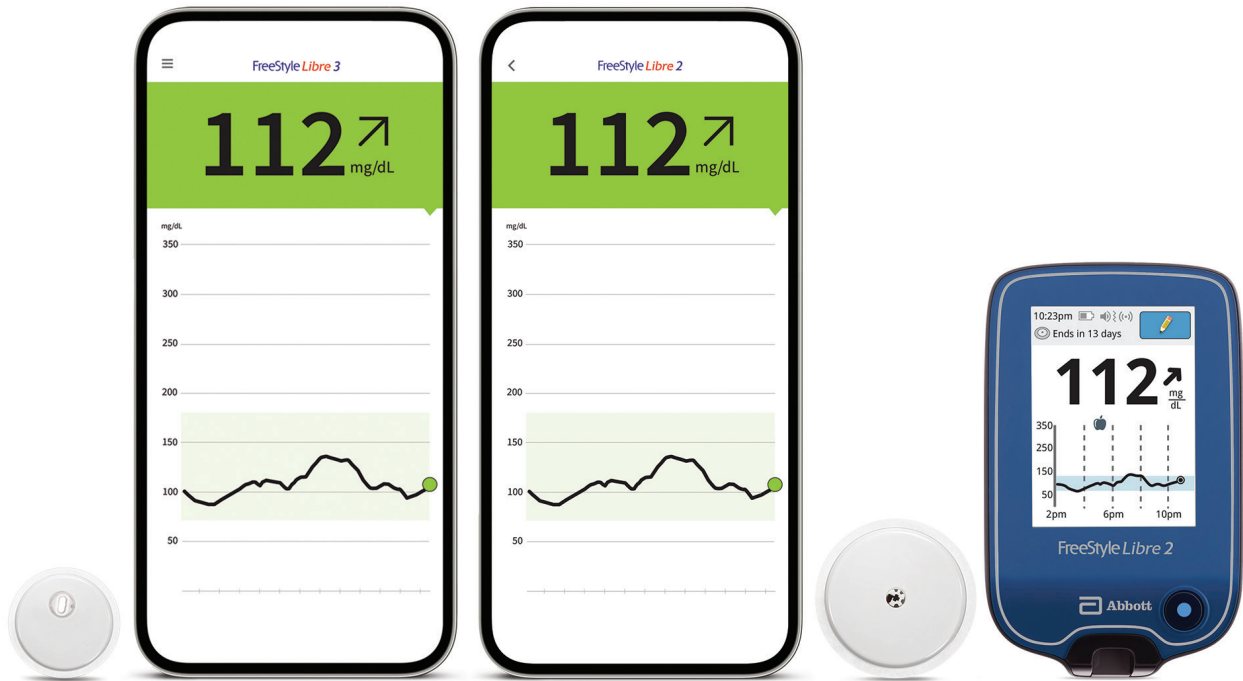

The Veteran agrees to ongoing medical appointments with the multidisciplinary team at least every 6 months (more frequently as recommended) to assess the adherence and benefit derived from CGMS, which will be documented in the medical record and used for justification for continued use.

Therapeutic CGM is provided based on the Veteran’s individual medical needs and is prescribed based upon clinician and patient shared decision making as recommended by the VA/DoD Guidelines of Management of Diabetes Mellitus in Primary Care (2017).²

Medicare coverage is available for the FreeStyle Libre 2 system if a compatible smartphone is used in conjunction with the Freestyle Libre 2 reader to review glucose data. Medicare and other third party payor criteria apply. Abbott provides this information as a courtesy, it is subject to change and interpretation. The customer is ultimately responsible for determining the appropriate codes, coverage, and payment policies for individual patients. Abbott does not guarantee third party coverage or payment for our products or reimburse customers for claims that are denied by third party payors. At this time, FreeStyle Libre 3 is not currently eligible for Medicare reimbursement, and Medicaid eligibility may vary by state. **1.** Data on file. Important Safety Information

Failure to use FreeStyle Libre 2 or FreeStyle Libre 3 systems as instructed in labeling may result in missing a severe low or high glucose event or making a treatment decision, resulting in injury. If glucose alarms and readings do not match symptoms or expectations, use a fingerstick value from a blood glucose meter for treatment decisions. Seek medical attention when appropriate or contact Abbott at 855-632-8658 or <https://www.FreeStyle.abbott/us-en/safety-information.html> for safety info. The circular shape of the sensor housing, FreeStyle, Libre, and related brand marks are marks of Abbott. Other trademarks are the property of their respective owners.
