

# LibreLinkUp

Simulated data for illustrative purposes only. Not real patient or data.

## Summary

LibreLinkUp allows others to view data shared by patients who use the FreeStyle LibreLink app and FreeStyle Libre sensors<sup>§</sup>.

Every FreeStyle LibreLink scan is automatically sent to a patient's smartphone<sup>†</sup> and up to 20 people can view results from a single FreeStyle LibreLink account.

**LibreLinkUp is compatible with Android and iOS smartphones.**

## LibreLinkUp

This material is specific for the EASD meeting. Product availability may vary by country. Not all features are available in all markets. If you require product information for a specific country please refer to your local Abbott website.

## Features

### BETTER DIABETES MANAGEMENT

LibreLinkUp helps patients manage their diabetes by sharing data with loved ones.<sup>§</sup> With the LibreLinkUp mobile app, they can receive notifications when a patient's glucose levels are too high or too low.<sup>||</sup>

### PATIENTS ARE FREE TO EXPLORE WITHOUT LANCETS<sup>\*,Ψ</sup>

Allows you to remotely monitor your loved one's glucose readings and trends, and be notified of glucose changes, day and night.<sup>§</sup>

## LibreLinkUp

*life. to the fullest.*

**Abbott**

\* Scanning the sensor does not require lancets.

Ψ For children aged 4-12, a caregiver at least 18 years old is responsible for supervising, managing, and assisting them in using the FreeStyle Libre system and interpreting its readings.

§ The LibreLinkUp app is only compatible with certain mobile device and operating systems. Please check [www.librelinkup.com](http://www.librelinkup.com) for more information about device compatibility before using the app. Use of LibreLinkUp and FreeStyle LibreLink requires registration with LibreView. The LibreLinkUp mobile app is not intended to be a primary glucose monitor: home users must consult their primary device(s) and consult a healthcare professional before making any medical interpretation and therapy adjustments from the information provided by the app.

|| Transfer of glucose data between applications depends on mobile connectivity.
