FLASH GLUCOSE MONITORING SYSTEM

GETTING MORE WITHOUT LANCETS[†]

Why prick, when you can scan?[‡]

You have been invited by your healthcare professional to attend a free, live, online education session for the FreeStyle Libre system

This program is designed to help you get more out of your FreeStyle Libre flash glucose monitoring system.

life. to the fullest.®

Abbott

Program information

This online education session – also called a webinar – will be hosted by an Abbott representative, alongside a diabetes educator. During this **1-hour, live educational event**, you will learn how to:

- Read and understand your FreeStyle Libre scans
- Incorporate what you learn from your reports – such as time in target, low-glucose events and daily patterns – into your daily life

You will be able to ask questions during this live event.

Secure your spot in 3 simple steps

There are a few steps we need you to follow before the date of your event:

Click on the link provided in your healthcare provider's email to be directed to the registration page and **register for the online education session**.

- The information you provide through this registration form will be used by companies working on behalf of Abbott for the sole purpose of registering you for the event.

Once registered, you will receive a **confirmation email**. If you do not receive this email within a day, please check your junk mailbox. Your confirmation email will contain the **unique meeting link** that you will need to join the webinar.

- You will also receive 2 reminder emails – one day and one hour before the event – containing this unique meeting link.

Ten minutes before the webinar begins, click on the unique meeting link that you received in your reminder email and you will be directed to the online education session. **This link is unique to you.**

- If you join from an iPad or iOS device, you will be prompted to download the Go2Webinar app when you click on the link. This may take a few minutes, depending on your internet connection.

When the webinar is complete, you will receive a thank-you email that will include helpful links to FreeStyle Libre educational materials and to our customer care information.

Some helpful reminders

- If you don't receive the emails, check your **junk mailbox**.
- Remember, the **meeting link** that you will receive in your confirmation and reminder emails is unique to you.
- You can join the online education session using a **desktop computer, laptop, tablet or smartphone**. No webcam is required.
- If you have a compatible smartphone, download the FreeStyle LibreLink app if you haven't done so already.[§]

Connect with us on Facebook (Abbott FreeStyle) to join a community of thousands of FreeStyle Libre users supporting each other in their journey. You'll also get access to helpful tips related to diabetes management, useful information about glucose monitoring and the ability to share experiences with other Canadians living with diabetes.

The FreeStyle Libre flash glucose monitoring system is indicated for measuring interstitial fluid glucose levels in adults aged 18 years and older with diabetes mellitus. Always read and follow the label/insert.

* The views expressed are not intended to be used for medical diagnosis or treatment, or as a substitute for professional medical advice. Please consult your physician or qualified healthcare provider regarding your condition and appropriate medical treatment. Individual symptoms, situations and circumstances may vary.

† Scanning the sensor does not require lancets.

‡ A finger prick test using a blood glucose meter is required during times of rapidly changing glucose levels when interstitial fluid glucose levels may not accurately reflect blood glucose levels or if hypoglycemia or impending hypoglycemia is reported by the system or when symptoms do not match the system readings.

§ The FreeStyle LibreLink app and the FreeStyle Libre reader have similar but not identical features. A finger prick test using a blood glucose meter is required during times of rapidly changing glucose levels when interstitial fluid glucose levels may not accurately reflect blood glucose levels or if hypoglycemia or impending hypoglycemia is reported by the FreeStyle LibreLink app or when symptoms do not match the app readings. The FreeStyle Libre sensor communicates with the FreeStyle Libre reader that started it or the FreeStyle LibreLink app that started it. A sensor started by the FreeStyle Libre reader will also communicate with the FreeStyle LibreLink app. The FreeStyle LibreLink app is only compatible with certain mobile devices and operating systems. Please check the website for more information about device compatibility before using the app. Use of FreeStyle LibreLink requires registration with LibreView.
