

RILEY and the **MAGIC RANGE**

**This book is dedicated to the strong children with diabetes
all around the world.**

**You are unique. You are amazing.
You are so very special.**

Riley and the Magic Range

Riley was a fantastic wizard.

She could paint pictures with her wand
with a “Brushidy-Bee.”

She could fly on her broom
and perform aerial tricks
with a “Dippity-Wee.”

You see, Riley had type one diabetes. But as long as she stayed in her magical glucose range[†], she was able to do all the magic she wanted.

There was one problem, though.

If Riley's glucose numbers went too high or too low out of her magic range, her spells would go out of control.

One morning, Riley was in her magical fortress in the woods.

She was hosting an enchanting tea party with her favorite guests—there was Suzy the Salamander, Bearald the Bear, Patrick the Pony and even Winnie the Wombat!

They were having a great time—sipping tea, drawing pictures, singing songs, and dancing about—but then things started to go awry.

The guitar started to
strum on its own
without care.

Her guests started
to break cups.

The spoons
flew in the air!

“Please, spells! Stop acting so bad!”
But the magic didn’t listen.

The crayons drew
on the wall.

Suzy jumped
on the table.

Riley was bopped
with a ball.
The magic was unstable!

It was then Riley realized, she must be out of her magical range[†]!

“Oh no, what will I do?!” cried Riley.
“Maybe my glucose levels are too low?
I must be out of my magical range[†]!
My spells are out of control!”

Suddenly, Riley's mom came into her magical fortress. Luckily, she had an alarm* that told her when Riley's glucose numbers were too high or too low†.

She already knew that something was wrong.

To be sure, she checked the number and saw her glucose level was, unsurprisingly, too low.

So she said, “Have this snack and everything will be all right.”

Riley took a bite of the apple. The crayons started drawing clearly and finally fell back to the table.

The guitar strummed in harmony before finally coming to a stop.

Suzy got off the table and the other guests stopped breaking cups, finally sitting back in their chairs.

The spoons fell to the floor with a CLINK.

For the rest of the day, Riley painted pictures with her wand with a “Brushidy-Bee.”

She performed aerial tricks on her broom with a “Dippity-Wee.”

And she had another tea party,
with a “Sippity-See.”

And none of her magic was naughty again...
at least for that day!

THE END

FreeStyle Libre 3 system is cleared to be used by children 4 years and older with Libre 3 sensor and 2 years and older with Libre 3 Plus sensor.

The FreeStyle Libre systems apps are only compatible with certain mobile devices and operating systems. Please check the Support section of our website for more information about device compatibility before using the apps. Use of the FreeStyle Libre systems apps may require registration with LibreView.

Medicare and other payor criteria may apply.

* Alarm notifications will only be received when alarm settings are enabled and turned on and sensor is within 33 feet unobstructed of the reading device.

† Default range is 70-180 mg/dL. Consult with a healthcare professional on individual target glucose range.e.
