People who have cardiovascular disease (CVD) or who are at high cardiovascular risk need early detection and management using counseling and medicines as appropriate. For immediate follow-up, the Afinion™ Lipid Panel test provides a full lipid panel that may be used in the diagnosis and treatment of lipid disorders: total cholesterol (Chol), high density lipoprotein (HDL) cholesterol, low density lipoprotein (LDL) cholesterol, triglycerides (Trig), non-HDL and Chol/HDL ratio.

Make Every Minute Count

AFINION™ Lipid Panel

HIGHLY ACCURATE RESULTS IN 7–8 MINUTES

WHOLE BLOOD, SERUM OR PLASMA

7–8-MINUTE TEST TIME

15 μL SAMPLE VOLUME

WHOLE BLOOD, SERUM AND PLASMA SAMPLE MATERIAL

HIGHLY ACCURATE AT THE POINT OF CARE

TRACEABLE TO CRMLN (CHOLESTEROL REFERENCE METHOD LABORATORY NETWORK)

CHOL 205 mg/dL

TRIG 155 mg/dL

HDL 55 mg/dL
AFINION™ 2 ANALYSER

THE CONNECTION BETWEEN DIABETES AND CVD

In all patients with diabetes, cardiovascular risk factors should be assessed at least annually. These risk factors include dyslipidaemia, hypertension, smoking, a family history of premature coronary disease and the presence of albuminuria. Testing ACR and lipid panel therefore plays a vital part in diabetes management.1,2

- Having diabetes increases the risk of CVD nearly two times compared with people who do not have diabetes.3
- Elevated HbA1c is associated with increasing CVD risk.3
- Over 60% of people with type 2 diabetes develop CVD.4
- 50% of people with diabetes die of CVD.5

AFINION™ 2 ANALYSER

The Afinion™ 2 Analyser is the result of years of continuous product innovation and refinement and delivers actionable point-of-care test results in just a few minutes.

With its compact size and panel of tests, the Afinion™ 2 System is ideal for point-of-care testing in physician offices, clinics, community health centers, retirement homes, emergency rooms and hospital outpatient clinics. From just a fingerstick sample, highly accurate results for CRP, HbA1c, ACR and lipid panel are made available during the consultation.

3-STEP PROCEDURE

1. Collect the sample with the integrated sampling device.
2. Place the sampling device back in the test cartridge.
3. Place the test cartridge in the analyser and close the lid. The processing starts automatically.
